

DANA[®]

A brand of JELD-WEN

OPEN. TO.
VARIETY OF WHITE.

OPEN. TO.

**BRIGHT JOY
AND A NEW
FEELING OF HOME.**

Open invitation: [DANA.at](https://www.dana.at)

They make a room feel brighter and more spacious, are timelessly beautiful and highlight many living styles: Interior doors all in white. No wonder that they are still one of the most popular room dividers. We at DANA show white doors in all their beauty and variety - and with ideas that will really change your living experience.

Discover the special opening and closing functions that make everyday life easier. OPEN. TO. a completely new door experience!

White doors are timelessly beautiful and give the illusion that your room is bigger than it actually is.

Experience special door ideas from DANA!

WE ARE RETHINKERS, NEW THINKERS, FORWARD THINKERS.

We are DANA.

Now we could tell you that we're part of the international JELD-WEN group and make the most popular doors on the Austrian market. But what's far more important is how that benefits you.

Over 45 years' experience and our principle of always imagining the next step for doors result in a constant stream of unique ideas. Ideas that revolutionise the opening and closing of doors and bring even more comfort into your home. Ideas that make the highest quality the norm.

On the following pages you can find out more about our innovations and our door models in white: bright, modern and amazingly multifaceted.
Happy reading!

DANAMOTION

No slammed doors, no danger.
For details, see p. 9

KONTEXT

Simple, no frills
and flush-fitting.
More details on p. 15

SWING

The space-saving door.
More details on p. 13

SMARTCLOSE, PROTECT+ PACKAGE

Quite simply more comfort.
Find out more on p. 11 and p. 22

INSIDE DOUBLE- LEAF GLASS SLIDING DOOR

For endless free space.
More on Inside on p. 18

INTERIOR

The door with no casing.
More details on p. 16

BECAUSE YOU CAN NEVER HAVE TOO MANY ADVANTAGES:

TWIN HINGES

Material and design quality at
standard prices on p. 20

FLATFIX HANDLES

Stripped-down handles with
a modern design on p. 19

TÜRENSTÄRKE PLUS

The standard for even more
durable doors on p. 8

LIVING WITH DANA.

ELECTRIC LOCK, REVERSO

Find out more on
p. 12 and p. 14

ENTRY DOOR

see dana.at

SILENT+ PACKAGE

Brings peace to the home.
All the advantages on p. 21

NIVELO

Flush-mounting, done with glass.
More details on p. 17

INSIDE SLIDING DOOR

For more on boundless free space, see p. 18

DANAMOTION EASY

Transparently more safety.
All the advantages on p. 10

AUFZU.DANA.AT/INNOVATIONEN

Modus 4 white matt

DANA

42
mm

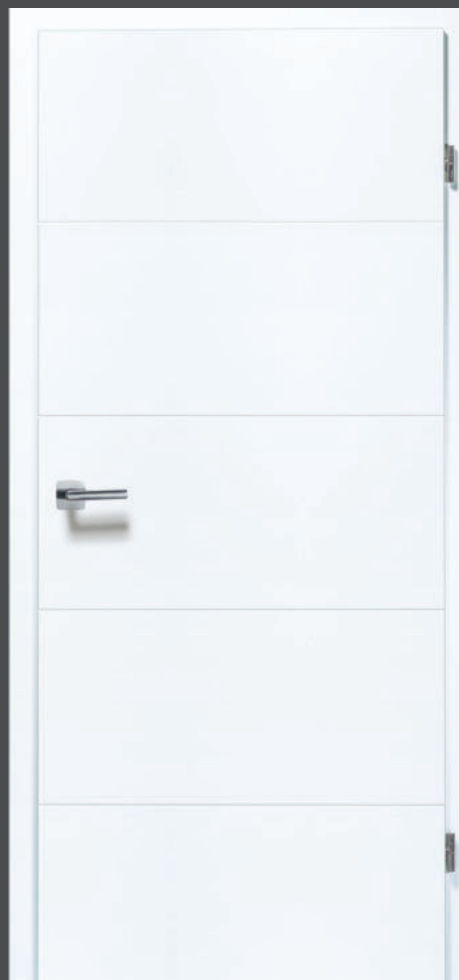

TÜRENSTÄRKE PLUS

Even longer-life and sturdier doors – as standard!

Our Türenstärke Plus makes premium quality standard: The door leaf of every DANA door is 42 mm thick – that's nearly 10% thicker than usual in the trade. What's more, a four-sided solid wood frame increases the quality and strength of your doors still further – at no extra cost!

- Even greater **stability** thanks to the high-quality, now four-sided solid spruce frame
- Even **more durable** doors: even more inherent stability
- Even more closing comfort: the door closes **flush and evenly**
- 42 mm door leaf thickness as new premium standard

tuerenstaerkeplus.dana.at

STOPS

at the preset angle.

Apart country oak

DANAMOTION

No slammed doors, no danger.

Sometimes powerful innovations are also very gentle: With DANAmotion, slammed doors, danger from doors bursting open uncontrollably and doorstops are things of the past:

- Automatic, smooth **stopping when opening**
- **Automatic soft closing**
- Stops at a preset opening angle (variable from 90° to 105°)
- The door also stays completely closed without a lock – for a particularly elegant look
- If desired, lockable with a push-button electric lock or chip card

aufzu.dana.at/danamotion

Float all-glass door

ALL-GLASS
SOFT-SHUT DOOR.

DANAMOTION EASY

More safety for all-glass doors.

DANA presents DANAmotion Easy, the impressive innovation for especially elegant all-glass doors: no more slammed or swinging doors; the dangers of doors flying open uncontrollably are now a thing of the past.

- **No slamming** of all-glass doors
- No uncontrolled flying open of doors
- **No doorstep** needed
- Automatic, slightly **cushioned stopping** when opening
- Automatic, slightly cushioned closing
- Stops at a preset opening angle (variable from 90° to 140°)
- Can be combined with GT-Kontext Standard and every other door in the Kontext range (see p. 15)

SMARTCLOSE

keeps the door shut –
without a conventional lock.

Modus 4

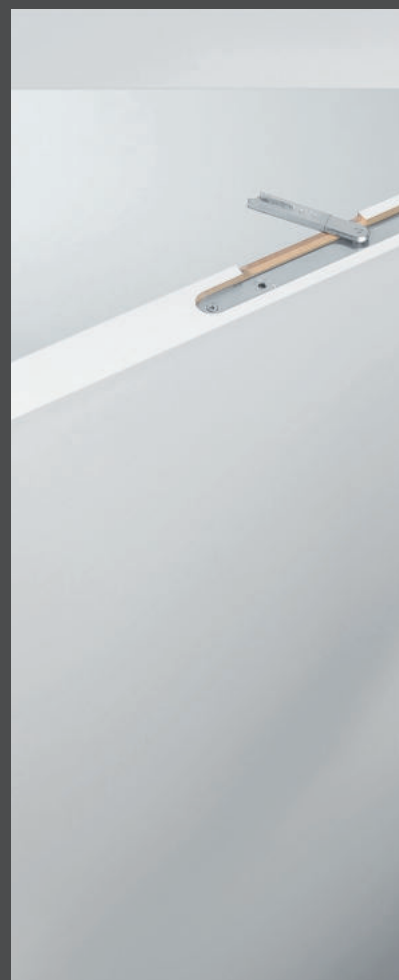

SMARTCLOSE

The smart way to close a door.

DANA smartClose **cushions the door** when it is closed and keeps it shut. This automatic shutting mechanism means **locks and conventional handles are no longer needed**. So you have even more scope with your designs and can, for example, choose elegant push or recessed handles..

- Stays shut even without a latch – for example with a push or recessed handle
- Gentle closing like that of kitchen drawers
- Extremely unobtrusive: the system is almost invisible once installed
- More design flexibility when choosing a handle because no lock is necessary
- On all-glass doors the holding mechanism is concealed behind an elegant covering strip
- If desired, lockable with a push-button electric lock or chip card

aufzu.dana.at/smartclose

Nizza push handle, inlay white
with integrated sensor for electric lock

The lock as a
DESIGN HIGHLIGHT.

ELECTRIC LOCK

And keys are no longer needed.

Many people find large key rosettes or escutcheon plates on doors unsightly. Nevertheless, there are rooms in the home that it would be good to be able to lock. Here, the DANA electric lock offers new possibilities: it locks the door at the touch of a button or by chip card!

- Particularly **easy to lock** – a touch of a button is all that's needed
- Wider range of designs irrespective of stipulated, conventional handle sets
- **Almost invisible** mechanism
- Easy and secure access
- Fitted in the handle itself, or as an unobtrusive lock button or with a chip card

aufzu.dana.at/elektroschloss

SWINGS TO THE SIDE
when opened.

Struktura
Cracked oak brown

SWING

Even more space to live in.

SWING doesn't just open, it swings to one side on the concealed rail. The door leaf reaches into both rooms. A real experience – and a real **space saver!**

- Especially space-saving: the door leaf can swing into both rooms
- More planning freedom thanks to the new door opening system
- Ideal wherever a **sliding door** is not feasible
- Cushioned closing
- **Can stand open in various positions**
- Passing through possible from both sides

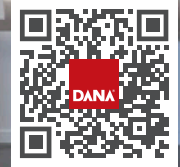

aufzu.dana.at/swing

Struktura cracked ash Pura

A SURPRISING
way of opening.

REVERSO

Ideal for narrow corridors.

Flush-fitting doors are ideally suited to a puristic interior design. Usually they open “inwards”, into the room – but this isn’t always appropriate, e.g. in narrow hallways. With REVERSO, you can now express your style everywhere: **opening into the passage, which takes up so much space, is avoided**; the room has a more harmonious feel.

- The door surprisingly opens into the next room
- Ideal for narrow corridor or narrow rooms
- Elegant appearance: door leaf and casing are flush – as with conventional flush-mounted doors that open forwards
- Striking design and space-saving
- Guaranteed to create a “wow moment” when the door is opened
- Depending on the model it can be fitted with the DANAmotion system for cushioned opening and closing
- Also available as an all-glass door

aufzu.dana.at/reverso

Door and wall in one colour

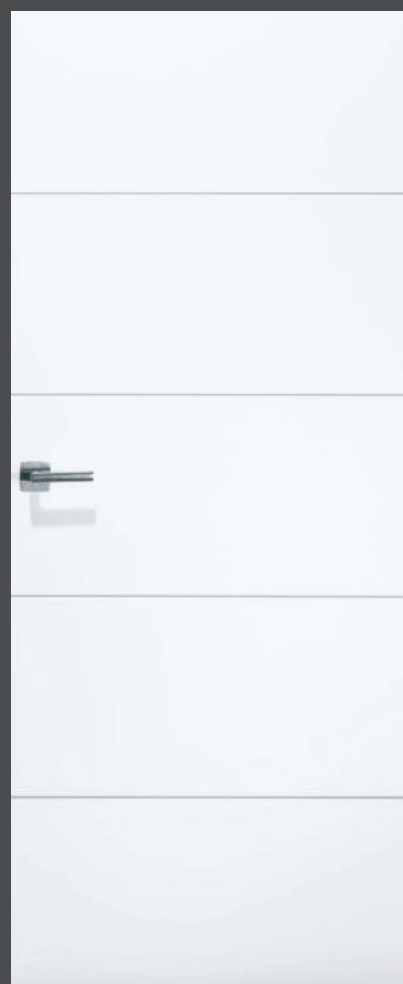

KONTEXT

Simple, no frills – yet so eye-catching.

KONTEXT really melts into the wall: **no casing, no hinges** are visible. This is not just modern and aesthetically pleasing – it also makes cleaning easier since no dust can gather on the casing.

- If desired, completely flush-fitting and with recessed handle
- Can be painted or papered to match the design of the wall – but is also available in every door design
- Door opens either outwards or inwards – both ways it looks the same
- Can also be fitted with the DANAmotion Easy system for cushioned opening and closing
- Also available as a ceiling-height version, as an all-glass door or Charisma moulded glass door (from page 48)

aufzu.dana.at/kontext

INTERIOR SYSTEM

The new freedom in door design.

Whose who prefer flush, clear forms will love this DANA innovation: the casing is replaced with a panel frame that can be fitted either in front or in the middle of the wall space **as desired**. That means you can decide on the building site which version you prefer. If the frame is placed in the middle a new, reduced stylistic idiom is created.

- **Flush-mounting** in a new form: nothing protrudes into the room any more – no handle, no knob
- Even more flexibility: You decide where the frame should be fitted
- With the DANA magnetic lock for soft and quiet closing
- The door and frame form one flush surface
- With concealed hinges
- With a recessed frame if required
- Also available as an all-glass door or ceiling-height version

aufzu.dana.at/interior

GT Float - flush-mounted

NIVELO

Flush-mounting, done with glass.

Flush doors have become an essential part of modern interior design – and at DANA they are now also available in an all-glass version! **Door, casing and hinges merge** into a single unit making rooms look bigger, brighter, more inviting. That is the future of glass doors, available today at DANA.

- Brings the trend of a reduced stylistic idiom to the all-glass door
- Door leaf, hinge and casing are all flush
- A design highlight for expansive, bright living space
- **Soft and quiet closing** with an elegant closing system: a discreet magnetic strip, invisible when the door is closed, keeps the door shut
- With all the advantages of our all-glass doors – more details from page 46

aufzu.dana.at/nivelo

DISAPPEARS
completely into the wall.

Mondria all-glass door

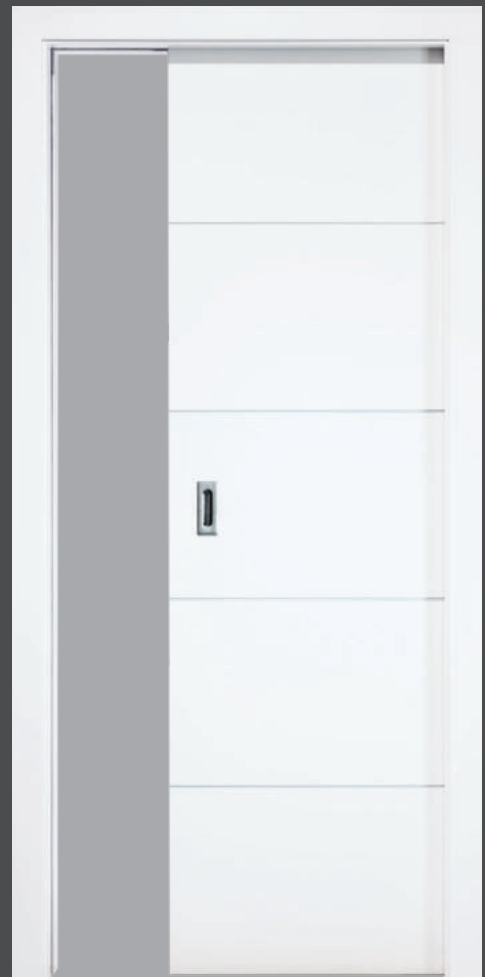

INSIDE

For endless free space.

A sliding door that **completely vanishes into the wall** when opened? DANA INSIDE makes it possible!

- Slides into the wall – door vanishes completely
- Maximum clearance width, more room to move
- With **DANAmotion System**
- Available in numerous designs
- Available as a solid door or all-glass door
- You will find more sliding door solutions at dana.at/schiebetueren

aufzu.dana.at/inside

WAFFER THIN & UNIQUE

New: the flattest rosette on the market – only 0.8 mm.

ELEGANTLY PURISTIC

in every detail: the most minimalist locking system on the market.

FLATFIX Denver with pin lock

FLATFIX HANDLES

The ingenuity of simplicity.

“Less is more” – our FLATFIX handles underline this motto beautifully. We have taken the trend towards reduction to extremes: the wafer-thin, 0.8 mm stainless steel rosette lies **virtually flush** with the door leaf – and that on both sides.

- Elegantly smooth appearance, **not only ideal for flush-fitting doors**
- Version available with pin lock (discreetly integrated in the rosette), with key or keyless – no more lost keys or exasperating searches
- Extremely **scratch-proof and durable**
- With round or rectangular rounded **stainless steel rosettes** or matt black rectangular-rounded rosettes
- A **design highlight for the same price as a standard version**

An insight into our range of

DOOR HANDLES

can be found on p. 58.

Palais white matt

A DESIGN HIGHLIGHT
at no extra cost.

TWIN HINGES

Elegance down to the smallest detail.

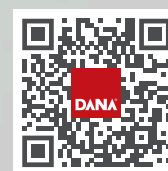

To lend your door support and ensure it moves flawlessly in the frame it is hung on hinges. For some people this is a tiny detail – at DANA it's a stylish eye-catcher: thanks to our **high-quality twin hinges** in a stainless steel look!

- All hinges have the same look for a harmonious overall impression, for both standard and functional doors
- Tremendous flexibility: even after installation the door is **easy to adjust**
- Perfectly matches all fittings
- A fine design highlight with a **high-quality surface**
- Also available in matt black

aufzu.dana.at/twinband

DESIGN HINGE
as standard on all
grooved doors.

Modus 4 white matt

SILENT+

For even more peace and comfort.

The DANA SILENT+ package is suitable for all living areas with higher noise levels - from children's rooms for sleeping babies to rooms containing rumbling washing machines.

- **Noise protection** to up to 35 dB – (compared to a standard interior door which manages 20 dB)
- Adds calmness and harmony to the room
- With **sound-absorbing insert** and **drop-down seal**
- **Improved dimensional stability** thanks to the reinforced door frame
- Almost every DANA door can **easily be modified** with the SILENT+ package
- Can also be combined with the PROTECT+ package (see p. 22)

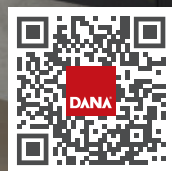

aufzu.dana.at/silentplus

Dual 310 white matt

STAYS STRONG – thanks to the reinforced door frame.

PROTECT+

For even greater stability.

The DANA PROTECT+ package is ideal for rooms in which humidity can temporarily increase, for instance the bathroom or utility room.

- Special solution for **temporary humidity increases**
- **Improved dimensional stability** thanks to the reinforced door frame
- **Coated bottom edge of the door leaf** – significantly better resistance to moisture absorption
- Almost every DANA door can **easily be modified** with the PROTECT+ package
- Can also be combined with the SILENT+ package (see page 21)

DANA BRAND SIGN

A sign of quality.

It is easy to see when a door is from DANA – from how it looks, how it feels, and the exceptional innovations it features.

Our elegant brand sign on the door and casing now reveals even more quickly that you have chosen the premium quality of DANA.

- Makes premium quality plain to see straight away
- A seal of quality that is itself an eye-catcher

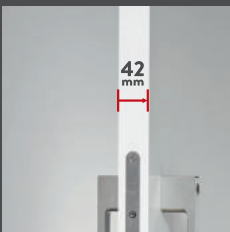

DANA THROUGH AND THROUGH.

When quality can be felt
in every detail.

WHITE GLASS, THE PUREST JOY.

BRIGHT AND CHEERFUL.

Every type of glass has its own advantages. Clear glass, for instance, has its typical greenish tinge, while in milk glass there is almost no hint of green at all. Many DANA all-glass doors, glass cutouts and glass sliding doors are now available in milk glass!

- A modern, exceptional look.
- Perfectly suited to all sorts of modern interior styles.
- More **transparency and colour brilliance**.
- Better at letting light and warmth through – ideal in rooms with no natural light source.

PLANNING FROM THE INSIDE OUTWARDS LETS YOU LIVE OUT YOUR IDEAS.

7 steps to a new door experience.

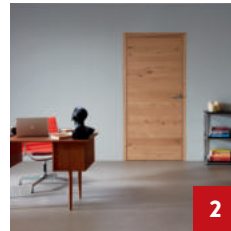

START.

1

Plan what you want your door to look like from the beginning.

If you are planning to build a house from the “outside to inside”, the whole world of DANA innovations is open to you.

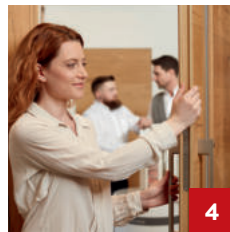

2

Bring your own style to life.

Your style and taste are unique – and that’s how you should live. Talk to your DANA dealer about any requests you have.

Get more out of any room.

How about our unconventional space-saving door, Swing or Reverso? At DANA, we have the solution for every room that can really improve how you live.

4

Select the desired dimensions.

DANA offers doors in the desired dimensions for all room setups – also as a room-height version, with fanlight etc.

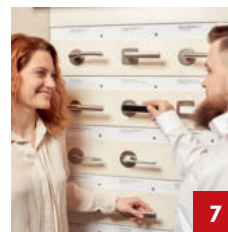

3

5

Give your door the most attractive frame.

Just like the picture frame for a beautiful painting, your door frame contributes to the overall impression of your DANA door.

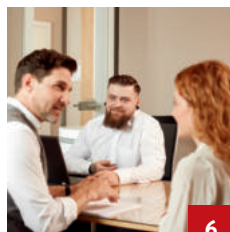

7

Discover our accessories.

You should get maximum enjoyment out of your DANA door, down to the last detail – for example with the simple and elegant Flatfix door handle and our magnetic latch lock for gentle closing.

Stand back and be amazed by our innovations.

A DANA door surprises time and again. For example, with the DANAmotion system for smooth opening and closing, the keyless locking system DANA smartClose and much more!

6
